
Justin Dugan

78 West Indian Springs Drive

Glenmoore, PA 19343

(484)-459-1958

justin.d.dugan@gmail.com

SKILLS

Programming Languages: Python, C#, Java, Assembly.

Robotics: Expertise in state-space control, model-based control systems, autonomous navigation, and embedded systems; awarded for Innovation in Control and Autonomous at FRC Worlds.

Hardware & Low-Level Engineering: Experienced in building custom computers, developing homemade electronics, and circuit design.

Mathematics: Advanced problem-solving, algorithm design, and application of mathematical principles in physics engines, game development, and robotics.

Leadership & Collaboration: Led programming teams in FRC robotics, organized game jams, and presided over multiple student organizations.

Education & Mentoring: Taught math as an instructor at Mathnasium, peer tutor, and TA, with additional experience refereeing elementary robotics competitions.

EXPERIENCE

Mathnasium, West Chester PA - Instructor

August 2023- PRESENT

- In a group setting of 5-25 students each with one on one instruction. Taught basic arithmetic to calculus.
- Greatly improved student math scores.

EDUCATION

University Scholars Program, West Chester PA

September 2018 - June 2025

1510 SAT

13 College level courses including Quantum Physics and Linear Algebra.

4.366 out of 4.5 Weighted GPA

AWARDS

Online Encyclopedia of Integer Sequences - Sequence Accepted

Autonomous Award - *FRC World Championship*

- Given for outstanding autonomous performance and software.

Innovation In Control Award - *FRC Regional Competition*

Community Leadership Award - *University Scholars Program*

Distinguished Honor Roll - *University Scholars Program*

AP Scholar with Distinction

ACTIVITIES

FRC Robotics - *Lead Programmer and Drive Team Member*

- Taught advanced programming concepts and advanced math, including linear algebra
- Created industry level and award winning software including object detection and odometry.
- Over 40 hours of participation weekly.

National Honors Society - *Member*

Quizbowl Team - *Varsity Member and Vice President*

Yearbook Club - *President*

Students For RARE - *President*

- NORD recognized rare disease advocacy club.

Spoke on School Faculty Panel About AI

Volunteer Tutoring

- Ran AP Physics C and Calculus tutoring every morning before school at University Scholars Program
- Tutored many students from University Scholars Program and Downingtown STEM.

Teacher's Assistant

- TA for STEM, AP Computer Science A, and AP Pre-Calculus.
- Set up labs, tutored students, and graded assignments.

School Ambassador

- Introduced students to school.
- Gave tours, met teachers.

Purple Comet - *Participant*

Volunteering Robotics

- Ran events at libraries, schools, and fundraisers to get students excited about STEM.
- Ran multiple FLL teams and helped run competitions.

PROJECTS

Breadboard Computer

- Built a homemade computer on breadboards using a 6502 microprocessor.

Custom Speaker

- Created and refined a homemade audio speaker from scratch.

Game Jams

- Participated in multiple 48, 72, and 96 hour game jams.
- A video game is created under extremely short time constraints.
- Placed in the top 10% on average.

Physics Engine

- Custom physics engine created in Desmos graphing calculator.

Godot Tools

- Created and published tools for Godot game engine.

Complex Domain Coloring

- Created a domain coloring renderer in Desmos graphing calculator.
